Subject: hair issue??

I was thinking of another potential source……I'll bet that most wear "boxers" which means that every time they scratch their nuts, they drop pubes right on the CR floor because nothing is preventing this from happening!!! …..main source is facial hair + pubes…..sounds fucked up but really can be an issue……new SOP= all CR employees wear "tightey whiteys"!! …or something similar……I'll bet that there is a way to solve this.
